PETPackaging Industry Development

63.5 gr
&
70.5 gr

Shaping the future of the packaging, Precision
in every preform

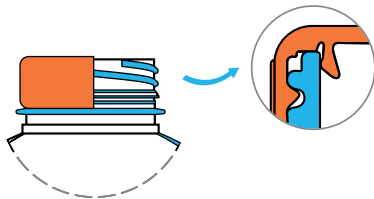

TECHNICAL SPECIFICATION		
WEIGHT	gr	63.75 & 70.5
RELATED BOTTLE VOLUME	L	1-10
NECK RING DIAMETER	mm	42
NECK FINISH	mm	Ø 38-3 starts- 0.5 turn
TOTAL LENGTH	mm	150
MATERIAL		PET
PRODUCTION TECHNOLOGY		IM

BENEFITS OF THIS PREFORM :

Sealing

Good sealing compared with 45mm neck finish preform.

Closure Option

Closure is more standardized and cheaper compared to 45mm neck finish preform.

Application of Use

Can be used in far reaching of industries specially for high volume containers such as: food industry, edible oil, mineral water, dairy and chemical industry.
Suitable alternative for PE packaging and metal packaging.

Optimized Design for Improved Strength

Improved bottle strength through optimized neck design and material redistribution to the body.

ADVANTAGES IN PRODUCTION LINE:

Tiner wall thickness to adopt by high-speed blow molding machines and even easy for lower speed lines.
